1. Summary of the activities since 1 July 2018

Anchoring its strategy as a “pure play” investor in European healthcare real estate, Aedifica announced and carried out a series of new investments in healthcare real estate during the first quarter of 2018/2019:

- Belgium: completion of two extension projects;
- Germany: acquisition of eight sites (including four sites subject to outstanding conditions announced during the prior financial year) and three construction projects (subject to outstanding conditions announced during the prior financial year);
- The Netherlands: acquisition of three construction projects (including one project subject to outstanding conditions announced during the prior financial year) and completion of one construction project.

Since the beginning of the 2018/2019 financial year, the fair value of marketable investment properties including assets classified as held for sale* increased by €73 million (i.e. +4 %), reaching €1,779 million by 30 September 2018 (€1,705 million at the beginning of the period). The total investment budget (mainly investments in ongoing construction and renovation projects and acquisitions subject to outstanding conditions) amounts to approx. €436 million as of 30 September 2018. Given the fair value of Aedifica’s investment properties and the development projects to be carried out over the next three years, the Company’s total portfolio will approach the €2 billion mark in the near future.

Since 30 September 2018, Aedifica acquired three sites in The Netherlands and two sites in Belgium, and announced the construction of a new site in The Netherlands, all in the healthcare real estate segment.

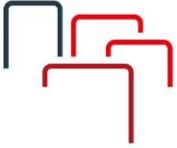

In addition to its investment activities, Aedifica strives to maintain optimal management of its real estate portfolio. The Company’s portfolio provides for excellent rental incomes, which amount to €24.3 million (an increase of 11 %) for the quarter ended 30 September 2018 (€21.8 million one year earlier).

At the end of the first quarter, Aedifica is ahead of the quarterly budget (in terms of both rental income and EPRA Earnings*) as derived from the annual outlook for the 2018/2019 financial year presented in the 2017/2018 Annual Financial Report (section 11.2 of the Consolidated Board of Directors’ Report).

Aedifica’s consolidated debt-to-assets ratio has increased and amounts to 45.9 % as of 30 September 2018 (44.3 % as of 30 June 2018). Given the anticipated decrease of the consolidated debt-to-assets ratio as a result of the disposal of a portion of the shares of Immo SA (of which the first phase was completed on 31 October 2018 – see section 2.7), the Company is set to continue on its path, pursuing continued growth.

Before even considering new opportunities in Belgium, Germany and The Netherlands, the Company’s future growth is ensured given its existing commitments to acquire, renovate, extend, redevelop and construct multiple sites. The pipeline as of 30 September 2018 for these types of projects represents a total committed budget of approx. €436 million, to be invested over a three-year period (see Appendix 1). 100 % of these projects are pre-let. This strategy allows Aedifica to maintain a portfolio of high-quality buildings that generate attractive net yields and to anchor itself as a “pure play” investor in European healthcare real estate.

Finally, note that new investment opportunities – fully aligned with the Company’s investment strategy – are currently under consideration.

3. Turnover of the quarter ended 30 September 2018

The consolidated turnover (**consolidated rental income**) for the first quarter of the current financial year amounts to €24.3 million, an increase of 11 % as compared to the same period of the previous financial year. This is above the quarterly budget (as derived from the annual outlook for the 2018/2019 financial year presented in the 2017/2018 Annual Financial Report), owing to the timing of the senior housing acquisitions as compared to what was budgeted.

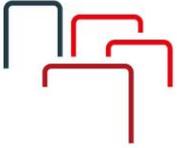

The consolidated rental income by segment is presented in the following table:

Consolidated rental income (x €1,000)	30 September 2018	30 September 2017	Var. (%) on a like-for-like basis*	Var. (%)
Healthcare real estate	20,697	18,177	+1.2%	+13.9%
Apartment buildings	2,578	2,485	+5.9%	+3.7%
Hotels	1,051	1,235	+2.5%	-14.9%
Inter-segment	-4	-49		
Total	24,322	21,848	+1.8%	+11.3%

The increase in rental income in the healthcare real estate segment (+€2.5 million; +13.9 % as compared to 30 September 2017 or +1.2 % on a like-for-like basis*) demonstrates the relevance of Aedifica's investment strategy in this segment, which generates more than 85 % of the Company's turnover.

Rental income of apartment buildings increased by 3.7 % as compared to 30 September 2017 (+5.9 % on a like-for-like basis*).

Rental income of hotels decreased due to the disposal of the Ring building (in June 2018, having an effect of -€0.2 million). On a like-for-like basis*, however, rental income of hotels increased (+2.5 %).

4. Consolidated portfolio as of 30 September 2018

At the end of the first quarter of the current financial year, Aedifica increased its portfolio of **marketable investment properties including assets classified as held for sale*** by €73 million, from a fair value of €1,705 million to €1,779 million (€1,824 million for the investment properties including assets classified as held for sale*). This 4 % growth comes mainly from net acquisitions (see sections 2.1, 2.2 and 2.3 above), completion of development projects (see sections 2.4 and 2.5 above) and changes in the fair value of marketable investment properties recognised in income (+ €7.8 million, or +0.4 % over the first quarter). The fair value of marketable investment properties, as assessed by independent valuation experts, is broken down as follows:

- Healthcare real estate: +€7.7 million, i.e. +0.5 %;
- apartment buildings: +€0.1 million, i.e. +0.0 %;
- hotels: -€0.0 million, i.e. -0.0 %.

As of 30 September 2018, Aedifica has 227 marketable investment properties including assets classified as held for sale*, with a total surface area of approx. 944,000 m², consisting mainly of:

- 149 healthcare sites with a capacity of approx. 12,000 residents;
- 768 apartments;
- 6 hotels comprising 544 rooms.

The breakdown by sector is as follows (in terms of fair value):

- 84 % healthcare real estate;
- 12 % apartment buildings;
- 4 % hotels.

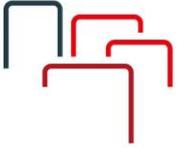

The geographical breakdown is as follows (in terms of fair value):

- 68 % in Belgium, of which:
 - 41 % in Flanders;
 - 18 % in Brussels;
 - 9 % in Wallonia;
- 19 % in Germany;
- 13 % in The Netherlands.

The **occupancy rate² of the total unfurnished portion of the portfolio** (representing 96 % of the fair value of marketable investment properties including assets classified as held for sale*) amounts to 99.0 % as of 30 September 2018. This is comparable to the record level reached at the end of the previous financial year (30 June 2018: 99.0 %).

² The occupancy rate is calculated as follows:

- For the total portfolio (excluding the furnished apartments): (contractual rents + guaranteed income) / (contractual rents + estimated rental value (ERV) on vacant areas of the property portfolio). We note that this occupancy rate includes the investment properties for which units are in renovation and hence temporarily not rentable.
- For the furnished apartments: % rented days during the financial year. This occupancy rate can thus not be compared to the one calculated on the rest of the portfolio, as the methodology is specific to this segment.

The **occupancy rate of the furnished portion of the portfolio** (representing only 4 % of the fair value of marketable investment properties) reached 82.6 % for the first quarter of the current financial year. This is a slight decline compared to the total occupancy rate for the 2017/2018 financial year (84.1 %), but an increase compared to the occupancy rate realised during the first quarter of the previous financial year (73.9 %).

The **overall occupancy rate**³ of the total portfolio reached 99 % as of 30 September 2018.

The **weighted average lease term** for all buildings in the Company's portfolio is 20 years; this is unchanged as compared to 30 June 2018. This impressive aggregate performance is explained by the large proportion of long-term contracts in the Company's portfolio.

° The amounts related to the furnished apartments correspond to the annualised rental income (incl. services charges and lump sum for charges such as water, gas, electricity, TV and internet, etc.) excl. VAT.

°° Based on the fair value (re-assessed every three months, increased with the goodwill and the furniture for the furnished apartments). In the healthcare real estate segment, the gross yield and the net yield are generally equal ("triple net" contracts), with the operating charges, the maintenance costs and the rents on empty spaces related to the operations generally being, in Belgium and (often) The Netherlands, supported by the operator (the same applies for hotel lease contracts). In Germany (and The Netherlands, in some cases), the net yield is generally lower than the gross yield, with certain charges remaining at the responsibility of the owner, such as the repair and maintenance of the roof, structure and facades of the building ("double net" contracts).

7. Outlook

The Board of Directors continues to pay close attention to the shifting economic and financial context and the associated effects on the Group's activities.

In the current economic climate, Aedifica's **key strengths** include the following:

- Its strategic focus on healthcare real estate and its expansion in Europe, which allows the Company to adapt to shifting market opportunities and economic conditions, in the context of an ageing population.
- Thanks to its investments in healthcare real estate, Aedifica benefits from indexed long-term rental incomes, which generate high net yields. The weighted average lease term on the total of its leases (20 years) provides a very good view toward the majority of its future income streams over the long term.
- External financing of the real estate portfolio (including commitments for development projects) is assured, with credit facilities in place totalling €1,217 million and only €38 million of these reaching maturity during the 2018/2019 financial year. Drawings on these variable-rate credit facilities are in large part covered by hedging instruments.
- Aedifica is in a good solvency position, with a consolidated debt-to-assets ratio of 45.9 % as of 30 September 2018 (well below the maximum legal limit of 65 % imposed for Belgian REITs and the contractual maximum of 60 % imposed by way of bank covenants). This is further supported by the stable fair values that the Company's real estate portfolio has demonstrated for many years. Aedifica has a balance sheet structure that permits financing construction and renovation projects and acquisitions subject to outstanding conditions (commitments representing approx. €436 million as of 30 September 2018, of which €389 million are still to be realised within a three-year period - see Appendix 1) and to realise new investments.

⁴ The effect of the changes in fair value of hedging instruments of -€1.74 per share as of 30 June 2018 is the impact in equity of the fair value of hedging instruments, which is negative for €32 million, mainly booked in the liabilities on the balance sheet.

2. Calculation details of the Alternative Performance Measures (APM for short)

For many years, Aedifica has used Alternative Performance Measures in accordance with ESMA (European Securities and Market Authority) guidelines published on 5 October 2015 in its financial communication. Some of these APM are recommended by the European Public Real Estate Association (EPRA) and others have been defined by the industry or by Aedifica in order to provide readers with a better understanding of the Company's results and performance. The APM used in this interim statement are identified with an asterisk (*). The performance measures which are defined by IFRS standards or by Law are not considered as APM, nor are those which are not based on the consolidated income statement or the balance sheet. In this appendix, the APM are defined, annotated and connected with the most relevant line, total or subtotal of the financial statements.

2.1. Investment properties

Aedifica uses the performance measures presented below to determine the value of its investment properties; however, these measures are not defined under IFRS. They reflect alternate clustering of investment properties with the aim of providing the reader with the most relevant information. The definition of these concepts, as applied to Aedifica's financial statements, may differ from those used in the financial statements of other companies. They are calculated as follows:

(x €1,000)	30/09/2018	30/06/2018
Marketable investment properties	1,774,758	1,701,280
+ Development projects	45,263	35,183

2.2. Rental income on a like-for-like basis*

Aedifica uses the net rental income on a like-for-like basis* to reflect the performance of investment properties excluding the effect of scope changes; however, this performance measure is not defined under IFRS. It represents rental income excluding the effect of scope changes. The definition of this concept, as applied to Aedifica's financial statements, may differ from that used in the financial statements of other companies. It is calculated as follows:

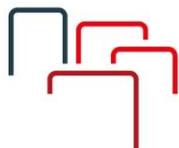

(x €1,000)	30/09/2018	30/09/2017
Rental income	24,322	21,848
- Scope changes	-2,720	-639
= Rental income on a like-for-like basis*	21,602	21,209

2.3. Equity and net asset value per share

Aedifica uses equity excl. changes in fair value of hedging instruments* to reflect equity before non-cash effects of the revaluation of hedging instruments; however, this performance measure is not defined under IFRS. It represents the line "equity attributable to owners of the parent" without cumulated non-cash effects of the revaluation of hedging instruments. The definition of this concept, as applied to Aedifica's financial statements, may differ from that used in the financial statements of other companies. It is calculated as follows:

(x €1,000)	30/09/2018	30/06/2018
Equity attributable to owners of the parent	960,057	941,647
- Effect of the distribution of the dividend 2017/2018	0	0
Sub-total excl. effect of the distribution of the dividend 2017/2018	960,057	941,647
- Effect of the changes in fair value of hedging instruments	31,717	35,439
Equity excl. changes in fair value of hedging instruments*	991,774	977,086

Aedifica uses net asset value per share excl. changes in fair value of hedging instruments* to reflect equity per share before the non-cash effect of the revaluation of hedging instruments; however, this performance measure is not defined under IFRS. It represents the line "equity attributable to owners of the parent" without cumulated non-cash effects of the revaluation of hedging instruments, divided by the number of shares outstanding (after deduction of treasury shares) at the closing date. The definition of this concept, as applied to Aedifica's financial statements, may differ from that used in the financial statements of other companies. It is calculated by dividing equity excl. changes in fair value of hedging instruments* by the number of shares outstanding (after deduction of treasury shares).
